Solution-Oriented Web Developer

Solution-Oriented Web Developer with experience in backend development, REST API integration, and data analysis using PHP, JavaScript, and Next.js. Experienced in developing automotive management systems, inventory tracking platforms, and web-based monitoring systems. Currently serving as a Project Manager and Data Analyst Intern at Jasa Raharja DKI Jakarta Regional Office, focusing on vehicle tax arrears analysis and data-driven monitoring solutions. Strong interest in scalable systems, analytics, and practical software development.

EXPERIENCE

Project Manager & Data Analyst Intern

Feb 2026 - Present

Jasa Raharja - DKI Jakarta Regional Office (Data Analysis & Web-Based System Development)

Jakarta, Indonesia

- Automated scraping workflows for thousands of vehicle tax datasets, reducing manual processing by ~70%
 - Developed a web-based monitoring and analysis system processing 50,000+ vehicle tax records for arrears monitoring in Jakarta
 - Built data analysis pipelines to support early warning and decision-making processes
 - Improved accessibility and monitoring efficiency for multiple insurance-related units including SWDKLLJ, IWKL, and IWPU
 - Collaborated with cross-functional teams as Project Manager, Data Analyst, and Backend Developer
-

Head of Human Resource Development Department (Computer Academic and Science)

March 2025 - Feb 2026

Student Executive Board of Computer Science

Jakarta, Indonesia

- Led the planning and execution of 3 major student programs, including PKKMB (freshman orientation), PKMP (leadership training), and Ilkom Gathering (Computer Science Student Cohort Gathering)
 - Coordinated cross-team collaboration to ensure smooth program delivery and participant engagement
 - Acted as a primary problem solver for internal issues before escalation to higher management
 - Maintained internal team stability and ensured effective communication across members
 - Built and managed relationships with external stakeholders and organizations
-

Website Developer

Jan 2025 - Dec 2025

E-Bengkel (REST API Integration, Inventory & Order Management System)

Jakarta, Indonesia

- Developed and integrated 5+ REST APIs for warehouse and branch order transfer systems
 - Built inventory and spare part tracking modules to support operational workflows
 - Implemented employee leave management and administrative modules for internal operations
 - Improved system efficiency by streamlining inter-branch data flow and transaction processing
-

Website Developer

Feb 2020 - July 2021

IKM Disperindag Riau (Database Management & CRUD Development,

Riau, Indonesia (Remote)

Admin Dashboard, Content Updates)

- Developed and maintained web-based CRUD systems for employee and content management using PHP and SQL
 - Built admin dashboard features used for managing 100+ content entries and employee records
 - Managed database operations to improve data organization and retrieval efficiency
-

PROJECT
